Why ENERCON?

- Active engagement with the industry including participation in the: NITSL and NEI Cyber Security Task Force, INPO Digital Workshop, NRC Digital Action Plan development, and I&C CCF Re-Evaluation.
- Our cyber security teams have performed customized, flexible cyber program support from limited scopes to full program assistance to meet customer needs.
- We can prepare detailed modification packages to resolve identified gaps and incorporate Cyber Security requirements.
- We do engineering design and analysis work in over 70% of U.S. nuclear plants.
- We have significant experience in device and system testing to ensure remediations function properly prior to plant installation.
- We can provide support for NRC inspection preparation and response.
- Our Network and Cyber Security Specialists, Engineers, SRO's, EP, and Analysis and Licensing staff understands plant systems, design and regulatory requirements.

ENERCON is an architectural engineering, environmental, technical and management services firm providing a broad range of professional services to private, public, and government sector clients internationally and throughout the United States. Our long list of satisfied clients has been built on our solid reputation as a premier provider of high quality, cost effective services.

Our clients know that we continuously strive to be a firm that is known for our integrity, innovation, excellence, and responsiveness.

Are YOU Ready for YOUR Milestone 8 Date?

What we've done, and what we do!

- Cyber security program evaluation
- Security Control Implementation Strategy (SCIS) consultation
